**From Saturday 18.01.2025 to Sunday 13.04.2025**

La **Gaiani Foundation - Museum and Treasure of Monza Cathedral** invites you to rediscover a hidden masterpiece of Lombardy art and participate in an important celebration of Italian cultural heritage.

The exhibition *Vigevano and Monza. For a polyptych by Stefano de' Fedeli* was born from the collaboration between two museum institutions and two cities, united by the subtle and precious bond of a fragmented and dispersed work of art over time: the **Polyptych of St John Beheaded**.

The **Monza Cathedral Museum and Treasure** will host the table depicting **St Catherine of Alexandria and St Benedict** from the collections of the **Vigevano Cathedral Treasury Museum** and, for the occasion, exhibited alongside the panels already preserved in Monza, depicting respectively the **Beheading of St John the Baptist** and the **Saints Peter and Paul**.

The latter, recently returned from Vigevano, were the protagonists of the same exhibition, held in 2024 at the city's Museum of the Cathedral Treasury.

Based on the reconstruction of the Monza polyptych according to the hypothesis formulated by scholar **Miklós Boskovits** in 2009, the exhibition *Vigevano and Monza* offers new insights and enriches the critical debate, providing a unique opportunity to deepen the study of **Stefano de' Fedeli** and expand the corpus of his works.
